

PREPARATION FOR ROACH TREATMENT

1. All people and pets **MUST** be gone for 4 hours. If you have a fish tank, just cover it with a damp towel.
2. Remove all items from kitchen cabinets, cupboards and drawers. These items may be placed on kitchen table or in a chair, etc. and covered with sheet. The shelves and drawers need to be washed thoroughly with soap and water.
3. Remove all items from bathroom cabinets, drawers and linen closets. These items can be placed in the bathtub or shower. Wash thoroughly with soap and water.
4. Make sure all grease is removed from stove and oven
5. Vacuum the entire apartment thoroughly, including area underneath refrigerator.
6. After cabinets, cupboards AND drawers have been sprayed; **DO NOT WASH** the chemical away. This will help protect against future infestation. Once dry the chemical is not harmful.
